

Children's University Virtual Mini Masterclass

Enrich Education and the Children's University are delighted to announce that during this March we will be hosting a virtual Children's University Mini Masterclass.

The Virtual Mini Masterclasses are free, informal, fun, and engaging online lessons that children can participate in at home during the weekends.

The sessions will take place throughout the year, with a different subject focus each time. The sessions provide an excellent opportunity for pupils to broaden their knowledge and understanding of a variety of subjects.

March's session will be an interactive look into the Earth and Space, focused on 'The Moon'. The class will aim to awaken children's interest in the moon and the solar system by introducing them to some fascinating facts and information and encouraging them to think through some key questions about our nearest neighbour in space.

Saturday 1st March 2025
10:00am – 10:45am

The simplest way to join the session is to follow the link below or scan the attached QR code with your smartphone.
